

UPGRADING ELI'S OPERATIONS CENTER

A Vital Upgrade for Regional Security & Safety

Upgrading Our Operations Center to Ensure Security and Save Lives: Our operations center in Eli serves as a critical coordination point for regional and national security. **This center is not only vital for our community, but for all residents of Judea and Samaria and the entire State of Israel. It is a hub that gathers crucial intelligence, directs military operations, and hosts meetings with senior security officials.**

However, despite its immense importance, our operations center is currently in poor condition, lacking the necessary equipment to effectively meet the challenges we face. We urgently need to upgrade it to ensure the security of our residents, soldiers, and community as a whole.

WHAT DO WE NEED?

LARGE PLASMA SCREENS & ADVANCED DISPLAY SYSTEMS

To showcase operational plans, live footage from surveillance cameras, real-time mission updates, and host high-level security meetings, we need the most advanced technological equipment.

EXTERNAL GENERATOR CONNECTION

The operations center must be equipped with a powerful external generator. In the event of a terror attack or incidents similar to the October 7th attack, when electricity might be cut off, we must ensure the center remains operational and can continue directing response efforts.

— OUR MESSAGE —

The security of Eli and the settlements in Judea and Samaria is not only about protecting our land and our community, but also about ensuring an immediate, efficient response in times of crisis. Every detail – every camera, every generator, every power bank – is crucial to guarantee the best defense for our residents and forces. When senior government and military officials visit, they need to know that we are doing everything within our power to ensure maximum efficiency and security.

Our mission is to continue building and strengthening this vital hub, enhancing our capabilities, and ensuring we are prepared to respond on Route 60 and throughout the region.

This is a matter of life and death, and a necessary step in our ongoing efforts to protect the land and the people of Israel.

**TOGETHER,
WE WILL CONTINUE
TO DEVELOP AND
STRENGTHEN OUR
SECURITY – FOR THE
BENEFIT OF ALL!**

— WHAT DO WE NEED? —

PORTABLE POWER BANKS FOR ALL TEAM MEMBERS

Every team member must be equipped with a portable power bank to ensure they can continue operations and save lives during emergencies. We cannot afford to be without these essential tools during critical times.

EMERGENCY SATELLITE PHONE

In case of emergency situations, we need a satellite phone to maintain communication with military forces and security teams, even when all other communication channels are down.

CAMERAS & MICROPHONES

When hosting large groups, military or governmental meetings, we currently lack the appropriate cameras and microphones. We need high-quality equipment to facilitate smooth, organized, and effective meetings.
