

Urgent need to purchase security drones

The Eli community was founded in 1984 and sits on the road between Jerusalem and Shechem (Nablus) with more than 5000 residents.

The region is surrounded by Arab villages who don't want us there and daily we do everything we can to thwart attacks. In the Judea and Samaria regions, we have had many terror attacks over the years including infiltrations with many casualties.

Over the last 9 months, 6 Jews were murdered at the Eli gas station in two terror attacks. This station is a central control point on Route 60 connecting Jerusalem and Shechem. There are many terrorist villages along Route 60. We are getting daily threats from the surroundings and how they want to repeat the October 7th pogroms in our area, the responsibility to protect our brothers who pass through Route 60 is ours and we will continue to protect them no matter what the cost!

The need is to purchase 3 state-of-the-art DJI MAVIC 3E drones that have thermal capabilities and will allow our IDF soldiers and first response teams to be able to lead the forces to the terrorists and have the advantage of knowing where they are and be able to eliminate the threat and save lives.

Since October 7th there has been an increase in attempts to attack the surrounding Jewish communities.

TOTAL PROJECT COST ABOUT- 26,446\$

Please join us now and help us purchase these drones and save lives

Thank you so much!
